HD Audio

Android 9.0

Yealink T58W Series Phone is a new set of IP phones delivering unparalleled communication experience with advanced features and capabilities. Powered by Android 9.0 OS, combining a 7" color touchscreen with well-organized UI, and supportive for wireless Bluetooth handset and plug-and-play camera, the T58W Series is ideal for personal desktop to implement HD audio/video collaboration with clarity, flexibility and reliability.

Window into Easy and Efficient Collaboration

The desktop phone can be more than a tool for audio calls. Featuring impressive experience of interaction and collaboration, the T58W Series is positioned to bring premium-level communication journey with HD video capability, 7" vivid touch screen and new version UI.

Support HD video conference with the five-megapixel camera CAM50

New UI with optimized and considerate layout design for more friendly and focus interactive experience

Unique rotating shaft to fulfill screen adjustment for varying lighting conditions

Free from Cord Constraint, Free from Distracting Noise

Calling on a desktop phone doesn't require to be around the table anymore. Yealink T58W Series has adopted innovative Bluetooth handset to pervade freely wireless communication.

Moreover, the professional hardware and cutting-edge acoustic algorithms of Yealink make the T58W Series expert at noise elimination and keeping every conversation clear and focus.

Take Smart Business Phone to Next Level

Boost by the upgraded chipsets, the T58W Series comes with enhanced system performance with fast response and reinforced processing capacity. The adoption of Android 9.0 OS also improves the data encryption, authority management, response speed and integratability to meet requirements of modern business and future sustainability.

Secure

Responsive

Scalable

Enterprise-level Security, Provision and Management

Taking data security as one of the most significant concerns, the T58W Series phones adopt Arm TrustZone technology to safeguard various ARM-based data and applications.

Supporting Yealink/Unify Square Device Management Platform, the management, provision and update can be implemented in a streamlined and simplified manner.
